

Who We Are

SecureSky delivers a complete portfolio of cloud security solutions to help organizations protect their cloud applications, services and infrastructure. Utilizing cloud-native, third-party and SecureSky patented technologies, our solutions meet the security, compliance and budget requirements of today's dynamic enterprises.

SecureSky solutions include Security Consulting, focused on identifying risk and deploying protective controls and policies and Managed Detection and Response (MDR), providing active threat detection and threat hunting, expert response and continuous protective control optimization.

Our services are supported by our Cloud Risk Protection technology and patented Active Security Protection Platform.

SecureSky Full Lifecycle

SecureSky cloud-based security solutions align with today's most commonly accepted frameworks and methodologies.

SecureSky offers services in all areas of the security lifecycle, and partners with your organization to understand your requirements.

Whether your security goal is identifying and managing risk, detecting and responding to threats, or advanced measures to test and optimize the controls you have in place, SecureSky can help.

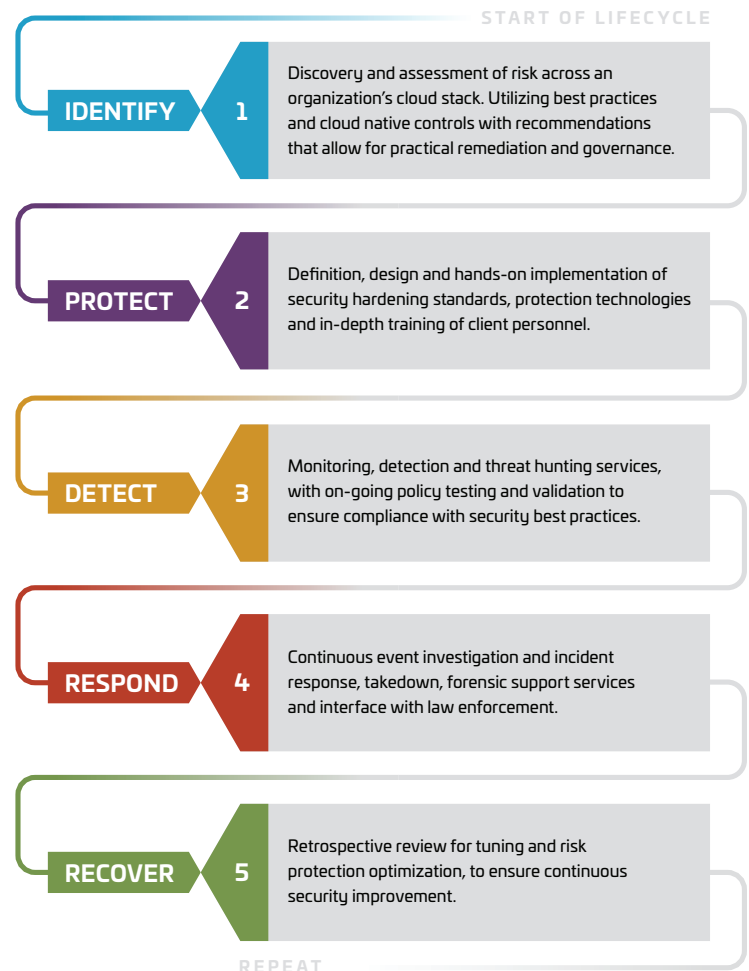

The Perfect "Cyber" Storm

The Perfect Cyber Storm refers to the combination of rapid cloud adoption coupled with and the growing cybersecurity skills shortage, the dissolution of traditional network boundaries and expanding attack targets, growing regulatory demands and traditional security approaches are designed for data centers, and do not quickly adapt to securing cloud environments.

All of these factors coming together require security measures designed for cloud environments.

SecureSky Approach

Organizations today find themselves constantly reacting to threats with limited resources.

SecureSky's focus is to maximize protective controls to stop threats, detect and respond to the right threats, and, most importantly, continuously tune to eliminate "noise" and add additional protections to further harden your environment.

A Blend of Expertise and Technology

SecureSky's delivery framework brings together the expertise and experience of our Consulting and Managed Detection and Response professionals with industry-leading tools, proprietary methodologies, continuous monitoring and adaptive response technologies.

"SecureSky helped my team secure our migration to O365 and Azure, assisting us to understand their native tool set together with different licensing and configuration scenarios. Hardening the environment and providing visibility has given us the confidence to fully leverage Office 365 functionality and our Azure application in our business."

- CISO, SecureSky client
