

Who We Are

SecureSky delivers a complete portfolio of cloud security solutions to help organizations protect their cloud applications, services and infrastructure. Utilizing cloud-native, third-party and SecureSky patented technologies, our solutions meet the security, compliance and budget requirements of today's dynamic enterprises.

SecureSky solutions include Security Consulting, focused on identifying risk and deploying protective controls and policies and Managed Detection and Response (MDR), providing active threat detection and threat hunting, expert response and continuous protective control optimization.

Our services are supported by our Cloud Risk Protection technology and patented Active Security Protection Platform.

SecureSky Consulting Services

SecureSky Consulting focuses on identifying risk across your organization, assessing against security best practices and compliance standards.

We implement protective controls and detection policies to strengthen your defenses and maximize native capabilities. SecureSky patented technology extends, enforces and validates these controls.

In the event of a cloud incident, SecureSky provides experienced resources for containment and mitigation, and we deploy controls to prevent future attacks.

Our service portfolio includes:

- » **Cloud Security Assessment**
- » **Application Security Assessment**
- » **Penetration Testing**
- » **Security Architecture Assessment**
- » **Compliance Services**
- » **Cloud Incident Response**

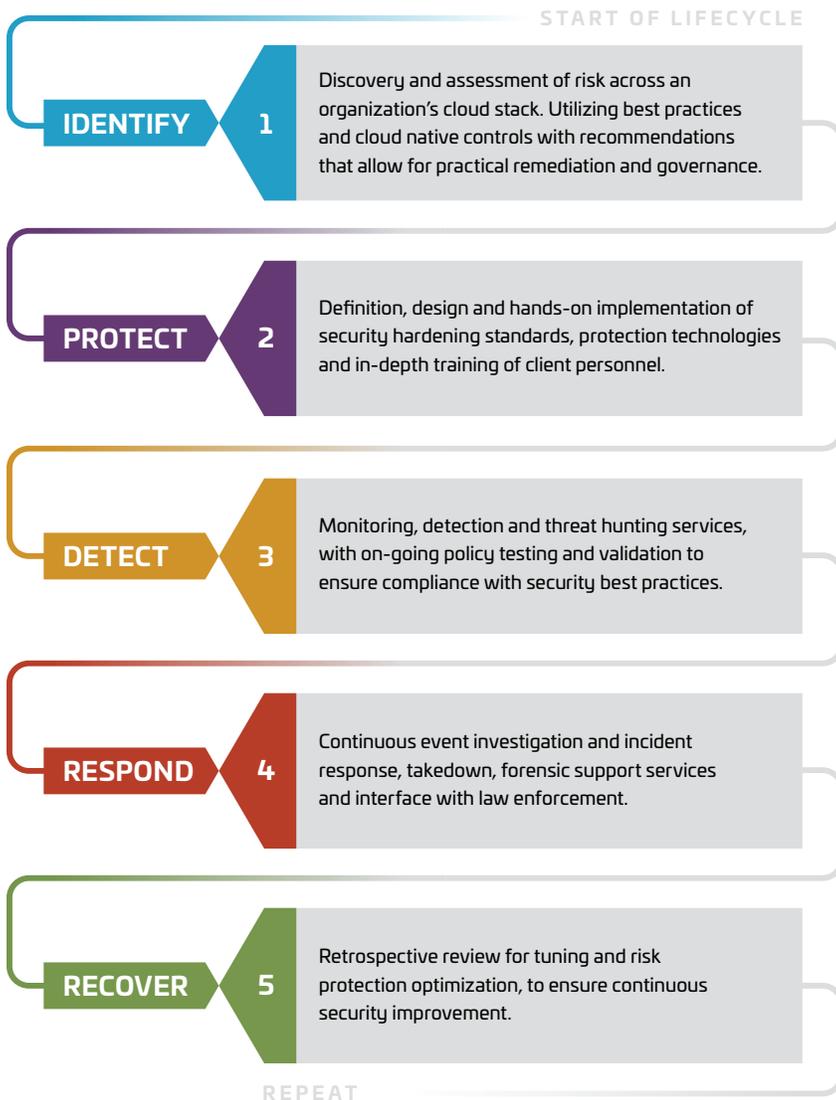

Working With SecureSky

We build long term relationships with each of our clients by providing business value and sharing expertise and knowledge.

We understand that you have a business to run, with objectives and time lines. When we say we will deliver by a certain date, we will do everything in our power to do so, and keep you fully apprised along the way.

Our practical approach will align with your budget and our solutions delivered and invoiced in a cost effective, transparent manner with no surprises.

SecureSky Full Security Lifecycle

SecureSky cloud-based security solutions align with today's most commonly accepted security and compliance frameworks and methodologies.

SecureSky offers services across the full security lifecycle and aligns to your business objectives.

SecureSky also provides threat detection and hunting, response and additional recovery services through our Managed Detection and Response team, backed by our patented technology suite.

Whether your security goal is identifying and managing risk, detecting and responding to threats, or advanced measures to test and optimize the controls you have in place, SecureSky can help.

Actionable Solutions. Knowledge Transfer.

SecureSky Security Consulting provides independent information, analysis and practical solution development related to cloud security and all aspects of a company's security program.

Our hands-on professional and experienced consultants provide actionable recommendations and remediation support.

We also view that our mission is to serve as an extension of your team, and we focus on transferring knowledge and training as we work with your company.
